Rina Peleg, Ceramic Structures

Rina Peleg Everson Museum of Art

Rina Peleg crosses the border of traditional pottery. She has developed a unique technique employing unusual processes to suit her creative agenda weaving clay with strings. Talia Mukmel created the structure from clay. The idea of using unconventional materials in ceramics is not new. Rina Peleg's work exemplifies this approach, combining traditional ceramic techniques with contemporary art practices.

The extruder has been a significant tool in her work, enabling her to produce a wide range of forms. Coils are formed from Westinghouse Structure. Ask Students to list the challenges that arise in using the extruder. Oil and porcelains, as well as stones, were in the artists' repertoire.
